Ann Arbor, MI 48108

2024 12 12

Dear HL7 Member,

The Clinical Interoperability Council Work Group has asked me to forward you a set of recommended corrections and modifications to the currently published “**HL7 CDA® R2 Implementation Guide: Emergency Medical Services; Patient Care Report Release 3 - US Realm**”.

The referenced document can be found from the [HL7 Product Brief](#).

This errata publication contains corrections for several issues:

- Includes the Document template that was inadvertently omitted from prior version (Issue tracker: [CDA-21198](#))
- Adds clarifying text in the **Open Specification** section to explain how additional content can be included if an implementer chooses to do so (Issue tracker: [CDA-20417](#))
- Adds clarifying text in the **Vocabulary and Value Sets** section about the use of OIDs from this guide (Issue Tracker: [CDA-20330](#))
- Repaired the navigation in the Table of Contents

The Work Group felt that the activity in the United States supporting the adoption of Meaningful Use Rules and a push for increased interoperability among providers and public health agencies warranted that this letter be sent out to ensure that all who use this Implementation Guide have the most current information.

Sincerely,

A handwritten signature in black ink, appearing to be "D. Vreeman", with a long, sweeping horizontal line extending to the right.

Daniel J. Vreeman, PT, DPT, MS, FACMI, FIAHSI, FHL7
